

# What Parents Say

Children's Treatment Network  
OF SIMCOE YORK

## What some parents have to say about their Single Plan of Care experience

*"The big difference is how everyone is working together to build on each other's efforts. It's so consistent now. Therapies, special equipment and treatment approaches are being mirrored at home and at school."*

Anne Cairns

*"Having a team that's working together and focused on Jessica is helping us meet the shared goals we set out faster. We feel truly blessed that this new Network system is helping everyone work together to help our daughter."*

Theresa and Darrell Sanders

*"Our Single Plan of Care meetings are amazing ... and very powerful. The professionals on our son's team – all his therapists, his teachers and the school principal – are focused on looking to where we're going next, and planning how we can all work together to achieve our goals. Our occupational therapist offers strategies to our son's teacher, his teacher makes suggestions for his physiotherapist, and around it goes. Everyone is working toward the same goals. Everyone is connected. We walk out of those meetings feeling really energized."*

York parent (name withheld at request)

*"I used to carry boxes of Lincoln's files around with me so I could brief all his therapists. Now we're all on the same page. We brainstorm together about what we each need to do at school and at home to help Lincoln reach his goals. I can call on them at anytime if I'm having an issue and they are there to help. It's a fantastic partnership. But the biggest thing for me is how safe and comfortable Lincoln feels. It's obvious to him that he's very much loved by everyone on his team."*

Stacy Ash

*"This is fantastic for parents. The Network is one central source for support to coordinated services. It's terrific to see all these professionals coming together to help our kids."*

Bev Pare

### What you can expect from the Single Plan of Care approach

- To be an active and valued member of your child's team
- To provide ongoing input into defining and developing your visions for your child and family
- To be informed and asked for consent to share your personal information with the team
- To participate in the development of meaningful goals and activities for your child and family
- To participate in your child's plan and treatment
